

## NEXT GENERATION METAL 3D PRINTING

Discover our cutting edge laser based cost-effective metal additive manufacturing system, designed for seamless part prototyping with a 6-axis robot and 4.5 KW laser system. Elevate your manufacturing capabilities with precision and versatility!

## ADVANCE MECHANICAL SERVICES

Advance Mechanical Services, is a Zed Gold Certified company encouraging research in India, through its Advance Hyrel3D range of additive manufacturing products.

**ADVANCE-LWAM** is our patented technology developed to support industrial prototyping of components using open source solid metal wires.

## KEY FEATURES

- ✓ Laser Precision Process
- ✓ Multi-Material & Metal Composites
- ✓ Design Freedom
- ✓ Powder Free Environment
- ✓ Enhanced Prototyping Productivity

## SUPPORTED MATERIALS

- Carbon and Low Alloy Steel
- Nickel-Based Alloys
- Stainless Steel
- Aluminum Alloys

## APPLICATIONS ACROSS INDUSTRIES

- ✈ Aerospace
- 🚗 Automotive
- ⚡ Energy
- 🏥 Medical
- 🔧 Tooling
